Appendix M. Old River Road Area of Interest. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).

# Bear Branch

ok-0512-r-004

Sedimentation Risk Index  
**28**

Common: 8.1m NW of Crestview  
Drainage: Yellow River      GPS: 30.876536310, -86.606435802

## Additional Site Features

Crossing Type and Quantity: Bridge, 1  
Crossing Materials: Wood  
Soil Types: 12,16,23,36,37,40,41,43,44,49  
Rt Approach Prism Fill: 2.0in  
Lt Approach Prism Fill: 2.0in

Notes: US outlet has high levels of sedimentation

# Deadfall Creek

ok-0512-r-005

Sedimentation Risk Index  
**40**

Common: 7.4mi NW of Crestview  
Drainage: Yellow River      GPS: 30.862141426, -86.613178012  
Land owner: Cheryl Mack

County: Okaloosa  
PLSS(T-R-S): 4N-24-11  
Parcel No.: 3  
Road Name: Old River Rd

Crossing Structure: DS

Notes: DS altered by power line crossing.

Appendix N. Other impaired river corridor and unpaved road crossing sites. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).

Notes: New growth on eroding bank may indicate historic erosion. However bank still appears to degrading.  
 Unpaved road on both banks. Aerials show evidence of past logging/clear cutting.

Notes: Data collected during flood stage- receding.

Private/primitive road 0.08mi west of the documented site, with a path leading to the river's edge

Since this occurs on an outside bend, it is likely that the erosion is mostly natural, with some contribution from the nearby path.

Notes: Large logging operation directly west of this site with bare soil.

Road or drainage from this area is leading into the river.

May be the cause of excessive turbidity and sedimentation downstream.

Notes: Old fence in stream and small creek on right bank.

Appears to be an access point for livestock, but there are none currently around.

Also an unpaved road on top of the left bank, as seen in the aerial.

| <i>Stream Channel Woody Material:</i> Moderate   |  |  |
| <i>Impoundments:</i> None  |  |  |
| <i>Substrate Composition:</i> Medium Sand  |  |  |
| <i>Bank Material:</i> Sand and Leaf Litter   |  |  |

Notes: Extremely shallow section of the river.

This sediment bar extends very far into the channel, leaving little room for the thalweg.
