Appendix G. Murder Creek Focal Area. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).

Notes: Numerous amounts of rip rap in stream is causing a partial fish passage barrier, as well as a fence that the US property owner has installed upstream from the bridge. Downstream is highly entrenched and its banks are mass wasting. Banks are primarily composed of clay. View other appendices on Murder Creek for more downstream details.

Notes: The public boat launch is frequented for AFB training. Team observed multiple Hummers at launch as well as witnessed closing of the road for the final mission for Ranger School. Boat launch is composed of about five percent concrete. Road leading to boat launch is within the flood plain and frequently flooded. Difficult to drive.

Notes: Old silviculture site? Very limited old growth, mostly the first few feet on top of the bank. The vegetation beyond the initial floodplain coverage is clearly young growth. Aerial image shows evidence of the old lateral meander channel.

Appendix I. Shoal River at US-90 Focal Area. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).

Appendix J. Lightwood Knot Area of Interest. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).

Appendix K. Upper Yellow River Area of Interest. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).

Appendix L. Oakwood Hills Area of Interest. Sites with blue headings are river corridor sites; sites with orange headings are unpaved road sites. Specific definitions and calculations described for calculating the river severity score are detailed in USFWS (2005a) and USFWS (2006); sediment Risk Index (SRI) are detailed in Witmer (2009).
